

# SOTERIA FINAL WORKSHOP

Miraflores de la Sierra  
25-27 June, 2019

**1<sup>st</sup> Announcement – [Register now](#)**

Dear colleague,

The H2020 project [SOTERIA](#) (Safe lOng-TERm operation of light water reactors based on Improved understanding of radiation effects in nuclear structural mAterials) will hold its final workshop at La Cristalera in Miraflores de la Sierra, Madrid, from June 25<sup>th</sup> to 27<sup>th</sup>.

The objective of the workshop is to disseminate the project final results and work progress among the nuclear research and industrial communities, and particularly end-users, as well as to identify future research needs. The workshop will serve as a forum for regulators, user groups, experts and industry, allowing them to share information and expertise on radiation effects on nuclear power plant components.

Please visit [our website](#) for registration and updated information on this event.

**Registration deadline: 17 May 2019**

Thank you for forwarding this announcement to other colleagues who might be interested.

Best regards,

Marta Colomer  
SOTERIA Workshop Organising Committee
